Management of Peripheral Intravenous Catheters

Clinical Care Standard: 07b-Proportion of patients with a PIVC in situ with the indication for insertion documented in their medical record

Identifying and definitional attributes

Metadata item type:	Indicator
Indicator type:	Indicator
Short name:	7b-Proportion of patients with a PIVC in situ with the indication for insertion documented in their medical record
METEOR identifier:	735081
Registration status:	Australian Commission on Safety and Quality in Health Care, Standard 25/05/2021
Description:	The proportion of patients with a PIVC in situ with the indication for insertion documented in their medical record.
Rationale:	The plan for a patient's PIVC should be clear and decisions relating to the device and its condition accurately recorded and accessible to all clinicians involved in the patient's care.
Indicator set:	Clinical care standard indicators: Management of Peripheral Intravenous Catheters Australian Commission on Safety and Quality in Health Care, Standard 25/05/2021

Collection and usage attributes

Population group age from:	All ages
Computation description:	Presented as a percentage.
Computation:	$(\text{Numerator} \div \text{Denominator}) \times 100$
Numerator:	The number of patients with a PIVC in situ where the indication for PIVC insertion is documented in their medical record.
Denominator:	The number of patients with a PIVC in situ.

Representational attributes

Representation class:	Percentage
Data type:	Real
Unit of measure:	Person
Format:	N[NN]
