# Antimicrobial stewardship: 6b-The proportion of prescriptions for which the duration, stop date or review date for the antimicrobial is documented

## Identifying and definitional attributes

Metadata item type:	Indicator
Indicator type:	Indicator
Short name:	6b-The proportion of prescriptions for which the duration, stop date or review date for the antimicrobial is documented
METEOR identifier:	736890
Registration status:	<a href="#">Australian Commission on Safety and Quality in Health Care, Standard 24/12/2020</a>
Description:	The proportion of prescriptions for which the duration, stop date or review date for the antimicrobial is documented.
Indicator set:	<a href="#">Clinical care standard indicators: antimicrobial stewardship 2020</a> <a href="#">Australian Commission on Safety and Quality in Health Care, Standard 24/12/2020</a>

## Collection and usage attributes

Computation description:	<p>For the numerator and denominator, there may be one or more prescriptions for any one patient during an episode of care. All prescriptions meeting the criteria for the numerator or the denominator should be counted.</p> <p>For the numerator, 'documented' means the prescriber has recorded the duration, stop date or review date for the prescribed antimicrobial in the patient's healthcare record.</p> <p>Presented as a percentage.</p>
Computation:	$(\text{Numerator} \div \text{Denominator}) \times 100$
Numerator:	Number of prescriptions for which the duration, stop date or review date for the antimicrobial is documented.
Denominator:	Number of prescriptions for antimicrobials.
Comments:	<p>See the <i>Antimicrobial Stewardship Clinical Care Standard</i> (ACSQHC 2020) for key considerations to optimise the use of antimicrobials.</p> <p>See <i>Antimicrobial Stewardship in Australian Health Care</i> (ACSQHC 2018) for further information on antimicrobial stewardship prescribing principles.</p>

## Representational attributes

Representation class:	Percentage
Data type:	Real
Unit of measure:	Service event
Format:	N[NN]

## Accountability attributes

**Other issues caveats:**

Applicable settings:

All hospital settings, including public and private hospitals, acute, subacute facilities, outpatient and day procedure services

General practice and other community and primary healthcare settings such as Hospital in the Home, Aboriginal community controlled health services, dental practices and community pharmacies

Residential aged care services.
