Data element attributes

Collection and usage attributes

Guide for use:	Dementia comorbidities refer to any diagnosed diseases or health conditions (apart from dementia), that are present or recorded at diagnosis of dementia. There is no limit on the number of conditions that can be specified.
Collection methods:	Information collected about comorbidities should be based on interviews or reports from the person with dementia or their carers, sourced from notes in the person's records or by observation.

Source and reference attributes

Submitting organisation:	Australian Institute of Health and Welfare
