| Short name: | PI01b-Proportion of Indigenous babies born within the previous 12 months who have birthweight recorded, December 2020 |
| METEOR identifier: | 739299 |
| Registration status: | <ul style="list-style-type: none">• Indigenous, Superseded 03/07/2022 |
| Description: | Proportion of Indigenous babies born within the previous 12 months whose birthweight has been recorded at the primary health-care organisation. |
| Rationale: | Low birthweight (newborn babies weighing less than 2,500 grams) is associated with an increased risk of ill health and is related to a higher mortality within the first year of life. Low birthweight is a particular issue for Indigenous Australians. Recording birthweight encourages the provision of appropriate care to limit the negative associations of low birthweight. |
| Indicator set: | Indigenous-specific primary health care national key performance indicators December 2020 Indigenous , Superseded 03/07/2022 |

Collection and usage attributes

Computation description: Proportion of Indigenous babies born within the previous 12 months whose birthweight has been recorded at the primary health-care organisation.

Presented as a percentage.

Birthweight is defined as the first weight of a baby obtained after birth.

Only live births are included.

Results arising from measurements conducted outside of the organisation that are known by the organisation are included in the calculation of this indicator.

'Previous 12 months' refers to the previous financial year or previous calendar year.

Computation: (Numerator ÷ Denominator) x 100

Numerator: Number of Indigenous babies born within the previous 12 months whose birthweight has been recorded at the primary health-care organisation.

Numerator data elements:

Data Element / Data Set

[Person—Indigenous status, code N](#)

Data Source

[Indigenous-specific primary health care national Key Performance Indicators \(nKPI\) data collection](#)

NMDS / DSS

[Indigenous-specific primary health care NBEDS December 2020](#)

Guide for use

The baby is considered Indigenous if one or both parents identify as Indigenous.

Data Element / Data Set

[Product of birth—birth status, code N](#)

Data Source

[Indigenous-specific primary health care national Key Performance Indicators \(nKPI\) data collection](#)

NMDS / DSS

[Indigenous-specific primary health care NBEDS December 2020](#)

Guide for use

Only live births are included.

Data Element / Data Set

[Person—birthweight recorded indicator, yes/no code N](#)

Data Source

[Indigenous-specific primary health care national Key Performance Indicators \(nKPI\) data collection](#)

NMDS / DSS

[Indigenous-specific primary health care NBEDS December 2020](#)

Denominator: Total number of Indigenous babies born within the previous 12 months who had a medical record at the primary health-care organisation.

Denominator data elements:

Data Element / Data Set

[Person—Indigenous status, code N](#)

Data Source

[Indigenous-specific primary health care national Key Performance Indicators \(nKPI\) data collection](#)

NMDS / DSS

[Indigenous-specific primary health care NBEDS December 2020](#)

Guide for use

The baby is considered Indigenous if one or both parents identify as Indigenous.

Data Element / Data Set

[Product of birth—birth status, code N](#)

Data Source

[Indigenous-specific primary health care national Key Performance Indicators \(nKPI\) data collection](#)

NMDS / DSS

[Indigenous-specific primary health care NBEDS December 2020](#)

Guide for use

Only live births are included.

Comments: Census date for reporting is 31 December 2020.

Representational attributes

Representation class: Percentage

Data type: Real

Unit of measure: Person

Format: N[NN].N

Indicator conceptual framework

Framework and dimensions: [Health Conditions](#)

Data source attributes
