Indigenous-specific primary health care: PI12b- Proportion of Indigenous regular clients regular clients classified as overweight or obese, December 2020

Identifying and definitional attributes

Metadata item type:	Indicator
Indicator type:	Indicator
Short name:	PI12b-Proportion of Indigenous regular clients classified as overweight or obese, December 2020
METEOR identifier:	739386
Registration status:	Indigenous , Superseded 03/07/2022
Description:	Proportion of Indigenous regular clients aged 25 and over who had their body mass index (BMI) classified as overweight or obese within the previous 24 months.
Rationale:	Obesity is closely associated with risk factors for the main causes of morbidity and mortality among Aboriginal and Torres Strait Islander people.
Indicator set:	Indigenous-specific primary health care national key performance indicators December 2020 Indigenous , Superseded 03/07/2022

Collection and usage attributes

Population group age from:	25 years and over				
Computation description:	<p>Proportion of Indigenous regular clients aged 25 and over who had their BMI classified as overweight or obese within the previous 24 months.</p> <p>Presented as a percentage.</p> <p>BMI: A measure of an adult's weight (body mass) relative to height used to assess the extent of weight deficit or excess where height and weight have been measured. BMI is the weight in kilograms divided by the square of the height in metres (WHO 2017).</p> <p>Calculated separately for the overweight and obese classifications.</p> <p>If the client had their BMI recorded more than once within the previous 24 months, only the most recently recorded result is included in this calculation.</p> <p>Only include those client's whose BMI was classified using a height measurement taken since the client turned 25 and a weight measurement taken within the previous 24 months.</p>				
Computation:	(Numerator ÷ Denominator) x 100				
Numerator:	<p>Calculation A: Number of Indigenous regular clients aged 25 and over who had their BMI classified as overweight within the previous 24 months.</p> <p>Calculation B: Number of Indigenous regular clients aged 25 and over who had their BMI classified as obese within the previous 24 months.</p>
