Indigenous-specific primary health care: PI13a- Number of Indigenous regular clients who have their first antenatal care visit within specified periods, December 2020

Identifying and definitional attributes

Metadata item type:	Indicator
Indicator type:	Output measure
Short name:	PI13a-Number of Indigenous regular clients who have their first antenatal care visit within specified periods, December 2020
METEOR identifier:	739389
Registration status:	Indigenous , Superseded 03/07/2022
Description:	<p>Number of Indigenous regular clients, who gave birth within the previous 12 months, and who:</p> <ul style="list-style-type: none">• had gestational age recorded at their first antenatal care visit with results less than 13/40 weeks• had gestational age recorded at their first antenatal care visit with results at or after 13/40 weeks and less than 20/40 weeks• had gestational age recorded at their first antenatal care visit with results at or after 20/40 weeks• did not have gestational age recorded at their first antenatal care visit or• did not attend an antenatal care visit.
Rationale:	The primary care needs of all Australians are met effectively through timely and quality care in the community. Good antenatal care is associated with positive health outcomes for mothers and babies.
Indicator set:	Indigenous-specific primary health care national key performance indicators December 2020 Indigenous , Superseded 03/07/2022

Collection and usage attributes

Computation description:	<p>Number of Indigenous regular clients, who gave birth within the previous 12 months, and who:</p> <ul style="list-style-type: none">• had gestational age recorded at their first antenatal care visit with results less than 13/40 weeks• had gestational age recorded at their first antenatal care visit with results at or after 13/40 weeks and less than 20/40 weeks• had gestational age recorded at their first antenatal care visit with results at or after 20/40 weeks• did not have gestational age recorded at their first antenatal care visit or• did not attend an antenatal care visit. <p>Presented as a number.</p> <p>'Birth' includes live births and still births if the birthweight was at least 400 grams or the gestational age was 20 weeks or more.</p> <p>'Previous 12 months' refers to either the previous financial year or the previous calendar year.</p> <p>Calculated separately for each gestational age range.</p>
Computation:	Numerator only.

Numerator:

Calculation A: Number of Indigenous regular clients, who gave birth within the previous 12 months and who had gestational age recorded at their first antenatal care visit with results less than 13/40 weeks.

Calculation B: Number of Indigenous regular clients, who gave birth within the previous 12 months and who had gestational age recorded at their first antenatal care visit with results at or after 13/40 weeks and less than 20/40 weeks.

Calculation C: Number of Indigenous regular clients, who gave birth within the previous 12 months and who had gestational age recorded at their first antenatal care visit with results at or after 20/40 weeks.

Calculation D: Number of Indigenous regular clients, who gave birth within the previous 12 months and who did not have gestational age recorded at their first antenatal care visit.

Calculation E: Number of Indigenous regular clients, who gave birth within the previous 12 months and who did not have an antenatal visit recorded.
