METEOR identifier:	740010
Registration status:	Health, Standard 15/04/2021
Definition:	The system of written or verbal communication used in a survey

Object Class attributes

Identifying and definitional attributes

Object class:	Survey
Definition:	The collection of information about characteristics of interest from some, or all, units of a population using well-defined concepts, methods and procedures.
	Statistical surveys collect data to answer a question by placing a statistical value to an indicator or measure. Surveys measure one or more characteristics of the whole population or a sample of the population.
