National Healthcare Agreement: PI 12–Waiting times for GPs, 2022

Identifying and definitional attributes

Metadata item type:	Indicator
Indicator type:	Progress measure
Short name:	PI 12–Waiting times for GPs, 2022
METEOR identifier:	740872
Registration status:	Health , Standard 24/09/2021
Description:	Length of time a person needs to wait to see a general practitioner (GP) for urgent medical care.
Indicator set:	National Healthcare Agreement (2022) Health , Standard 24/09/2021
Outcome area:	Primary and Community Health Health , Standard 07/07/2010

Collection and usage attributes

Population group age from:	15 years
Computation description:	<p>The interpretation of ‘urgent medical care’ was left to the respondent.</p> <p>Numerator refers to waiting time for most recent urgent appointment with a GP in the last 12 months.</p> <p>Population is limited to persons aged 15 and over.</p> <p>Analysis by remoteness and Socio-Economic Indexes for Areas (SEIFA) – Index of Relative Socio-Economic Disadvantage (IRSD) is based on usual residence of the person.</p> <p>Presented as a percentage.</p> <p>95% confidence intervals and relative standard errors are calculated for rates.</p>
Computation:	Crude rate: $100 \times (\text{Numerator} \div \text{Denominator})$ calculated separately for each waiting time category (within 4 hours, 4 hours or more but within 24 hours, and 24 hours or more).
Numerator:	Number of persons aged 15 and over who reported seeing a GP for urgent medical care (for their own health) within specified waiting time categories.

Numerator data elements:	<table border="1"><tr><td>Data Element / Data Set</td></tr><tr><td>People who reported seeing a GP for urgent medical care (for their own health)</td></tr><tr><td>Data Source</td></tr><tr><td>ABS Patient Experience Survey (PEX)</td></tr><tr><td>Guide for use</td></tr><tr><td>Data source type: Survey</td></tr></table>	Data Element / Data Set	People who reported seeing a GP for urgent medical care (for their own health)	Data Source	ABS Patient Experience Survey (PEX)	Guide for use	Data source type: Survey

Disaggregation:

2020–21—State and territory, by waiting time category.

2020–21—State and territory, by waiting time category, by:

- remoteness (Australian Statistical Geography Standard (ASGS) – Edition 2016 – Remoteness Area) (Major cities, other) (not reported)

2020–21—Nationally, by waiting time category, by (all not reported):

- sex
- Socio-Economic Indexes for Areas (SEIFA) Index of Relative Socio-Economic Disadvantage (IRSD) – 2016 – deciles
- remoteness (Australian Statistical Geography Standard (ASGS) – Edition 2016 – Remoteness Area) (Major cities, Inner regional, Outer regional, Remote/Very remote)

2020–21—State and territory (non-remote areas of Australia only), by waiting time category, by sex (not reported).

Some disaggregation may result in numbers too small for publication.

Disaggregation data elements:**Data Element / Data Set**

Person—area of usual residence

Guide for use

Data source type: Survey

Comments: Most recent data available for the 2022 National Healthcare Agreement performance reporting: 2020–21 (total population: PEx); 2018–19 (Indigenous only: NATSIHS).

Non-Indigenous data from the Patient Experience Survey (PEx) may not be directly comparable with data for Indigenous people from the NATSIHS 2018–19.

Data for the Northern Territory should be interpreted with caution as the PEx excludes persons resident in the Indigenous Community Strata, which comprises about 20% of the estimated resident population of the Northern Territory.

Representational attributes

Representation class: Percentage

Data type: Real

Unit of measure: Person

Format: N[NN].N

Indicator conceptual framework

Framework and dimensions: [Accessibility](#)

Data source attributes
