Person—Individual Healthcare Identifier, N(16)

Identifying and definitional attributes

Metadata item type:	Data Element
Short name:	Individual Healthcare Identifier
Synonymous names:	IHI
METEOR identifier:	743458
Registration status:	Health , Standard 20/10/2021
Definition:	The numerical identifier that uniquely identifies each individual in the Australian healthcare system.

Data element concept attributes

Identifying and definitional attributes

Data element concept:	Person—Individual Healthcare Identifier
METEOR identifier:	432486
Registration status:	Health , Standard 08/05/2014
Definition:	The identifier that uniquely identifies each individual in the Australian healthcare system.
Object class:	Person
Property:	Individual Healthcare Identifier

Value domain attributes

Identifying and definitional attributes

Value domain:	Identifier N(16)
METEOR identifier:	426832
Registration status:	Health , Standard 07/12/2011
Definition:	A unique combination of numbers that identifies an individual or organisation where healthcare is provided within Australia.

Representational attributes

Representation class:	Identifier
Data type:	Number
Format:	N(16)
Maximum character length:	16

Source and reference attributes

Submitting organisation:	Cancer Australia
Reference documents:	National E-Health Transition Authority 2010. HI service: concept of operations. Version 2.0-final release. Sydney: National E-Health Transition Authority

Data element attributes

Collection and usage attributes

Guide for use:	Each person's Individual Healthcare Identifier (IHI) is unique within the Australian healthcare system. Record the full IHI for an individual. The IHI is part of the Australian Government's digital health initiative developed to enhance the way information is exchanged, shared and managed in the Australian health sector. Electronic identifiers and the systems underpinning them were developed and are maintained by the Healthcare Identifiers (HI) Service. IHIs are automatically assigned to all individuals registered with Medicare Australia or enrolled in the Department of Veterans' Affairs (DVA) programs. Those not enrolled in Medicare Australia or with the DVA are assigned a temporary number when they next seek health care; this is then validated by the HI Service Operator and becomes their unique IHI. Each IHI has an Record Status; this describes whether verification of the identifier of the individual has occurred and is based on the evidence available of a person's identity. The IHI number does not change regardless of the person's Record Status. Each IHI also has a Number Status; this describes whether the IHI number is in use: The format of the number is as follows: Digits N1-N6: The issuer identification number, which in turn is made up of: N1-N2, Major industry identifier: 80 = health N3-N5, Country code: 036 = Australia N6, Number type: 0 = IHI Digits N7-N15: Individual account identification (9 digits for the unique identifier) Digit N16: Check digit
Collection methods:	Authorised healthcare providers and their authorised staff can access an individual's IHI online through the HI Service at the Australian Government Services Australia website.
Comments:	The IHI is an Australian Government's digital health initiative and supports the accurate retrieval, discovery and recording of an individual's electronic health information, as part of the delivery of healthcare in Australia.
