Urgency Related Group classification (version 1.4)

Identifying and definitional attributes

Metadata item type: Classification Scheme

Synonymous names: URG
METEOR identifier: 743560

Registration status: <u>Tasmanian Health</u>, Standard 04/05/2021

Definition: A classification for the reasons for patient attendance at an <u>emergency</u>

department and the complexity of cases that an emergency department treats.

Classification structure: Episodes of care are grouped initially on the basis of episode end status (also

known as 'disposition'):

Admitted

Non-admitted

Did not wait

Within the disposition categories of admitted and non-admitted, episodes are grouped further based on the urgency of a patient's need for care (as reported by triage category) and the patient's diagnosis. For example:

Admitted

Triage 1

All major diagnostic blocks

o Triage 2

Alcohol/drug abuse

Musculoskeletal/connective tissue illness

Circulatory system/respiratory system illness

Injury

Poisoning

All other major diagnostic blocks
