Representational attributes

Classification scheme: <u>Urgency Related Group classification (version 1.4)</u>

Representation class:CodeData type:StringFormat:[X]N[N]

Maximum character length: 3

Source and reference attributes

Submitting organisation: Department of Health Tasmania

Data element attributes

Collection and usage attributes

Comments: The urgency related group (URG) is derived from the urgency disposition group

(UDG) which classifies patients into 12 groups based on disposition (admitted or discharged) and urgency (triage category 1-5), including a category for patients who did not wait for treatment as well as a category for patients who died.

The URG classification system segments the UDG classification system further by

using 26 major diagnostic blocks.
