Mental Health Carer Experience of Service NBEDS

Identifying and definitional attributes

Metadata item type:	Data Set Specification
METEOR identifier:	745391
Registration status:	Health , Standard 10/06/2022
DSS type:	Data Set Specification (DSS)
Scope:	<p>The scope of the Mental Health Carer Experience of Service National Best Endeavours Data Set (MH CES NBEDS) is state and territory public sector Specialised mental health services.</p> <p>As specified by the Mental Health Carer Experience Survey, carers are the family member, partner or friend of someone with a mental illness whose lives are also affected by that illness. Carers provide support and assistance to the person with a mental illness.</p> <p>Specialised mental health services are those with a primary function to provide treatment, rehabilitation or community support targeted towards people with a mental disorder or psychiatric disability. These activities are delivered from a service or facility that is readily identifiable as both 'specialised' and 'serving a mental health care function'.</p> <p>A service is not defined as a specialised mental health service solely because its clients include people affected by a mental disorder or psychiatric disability.</p> <p>The definition excludes specialist drug and alcohol services and services for people with intellectual disabilities, except where they are specifically established to assist people affected by a mental disorder who also have drug and alcohol related disorders or intellectual disability.</p> <p>The services can be sub-units of hospitals that are not, themselves, specialised mental health establishments (for example designated psychiatric units and wards, outpatient clinics etc).</p>

Collection and usage attributes

Guide for use:

The Mental Health Carer Experience Survey is offered to carers of a [Mental health consumer](#) to rate their experience of a public sector [Specialised mental health service](#).

The survey was developed by the Australian Mental Health Outcomes and Classifications Network (AMHOCN) under the auspices of the former Mental Health Information Strategy Standing Committee (MHISSC) of the former Australian Health Ministers Advisory Council (AHMAC). It was funded by the Australian Government Department of Health to give effect to the commitments in the Fourth National Mental Health Plan, which included the development of consumer and carer experiences and perceptions of care as a priority quality improvement initiative to strengthen the focus of the mental health sector on measures of experiences of care.

Following national and international literature reviews, sector consultations, field trials and psychometric validation, the survey was delivered as a measure suitable for national use in public sector mental health services. The measure captures information about issues meaningful and relevant to carers and, given its strong alignment to Standard 7 of the National Standards for Mental Health Services, can be used by services to identify areas for quality improvement in service delivery.

This NBEDS contains metadata describing 37 questions included in the Mental Health Carer Experience Survey, which explores the experience of service by carers in the three months prior to the survey completion. The exact wording of each survey question to be used in collection of this NBEDS can be found in the DSS specific information for each data element. The NBEDS also includes a number of demographic or contextual data elements. Free text fields that are part of the survey are not included.

Metadata items that reflect specific questions in the Mental Health Carer Experience Survey are listed below using a sequence number corresponding to the number of the item in the survey. Metadata items used for demographic or contextual data elements are not given a sequence number. Please refer to the DSS specific information for more detail.

A Mental Health Carer Experience Survey: Guide for Use is available on the [Australian Mental Health Outcomes and Classification Network](#) (AMHOCN) website (AMHOCN 2021).
