Non-admitted patient emergency department service episode—episode end date

Identifying and definitional attributes

Metadata item type: Data Element Concept

METEOR identifier: 746701

Registration status: Health, Standard 20/10/2021

Tasmanian Health, Standard 07/11/2023

Definition: The date on which the non-admitted patient emergency department service

episode ends.

Context: Emergency department care.

Object Class attributes

Identifying and definitional attributes

Object class: Non-admitted patient emergency department service episode

Definition: The treatment or care between when a patient presents at an <u>emergency</u>

department and when the non-admitted patient emergency department clinical

care ends.

Context: Emergency department care.

Specialisation of: Service episode

Collection and usage attributes

Guide for use: Includes patients who do not wait for treatment once registered or triaged, and

those who are dead on arrival.

Both a non-admitted patient emergency department service episode and an admitted patient episode of care should be recorded for patients who subsequently undergo a formal admission. The end of the non-admitted patient emergency department service episode should indicate the commencement of the admitted

episode of care, if applicable.

A non-admitted patient emergency department service episode ends when either the patient is admitted or, if the patient is not to be admitted, when the patient's emergency department non-admitted clinical care is recorded as completed, or

when they are recorded as having left at their own risk.

Comments: This metadata item has been defined to support the national minimum data set for

Non-admitted patient emergency department care.
