Indigenous-specific primary health care: PI01b-Proportion of Indigenous babies born within the previous 12 months who attended the organisation more than once, and who have birthweight recorded, June 2021

Identifying and definitional attributes

Metadata item type:	Indicator
Indicator type:	Indicator
Short name:	PI01b-Proportion of Indigenous babies born within the previous 12 months who attended the organisation more than once, and who have birthweight recorded, June 2021
METEOR identifier:	747640
Registration status:	Indigenous, Superseded 06/11/2022
Description:	Proportion of Indigenous babies born within the previous 12 months who attended the **funded organisation** more than once, and whose **birthweightwas recorded.**
Rationale:	Birthweight is a key indicator of a baby's immediate health and a determinant of their future health. Measuring birthweight allows infants to be given early and suitable intervention, which can mitigate adverse outcomes.
Indicator set:	Indigenous-specific primary health care national key performance indicators June 2021 Indigenous, Superseded 06/11/2022

Collection and usage attributes

Computation description:	Proportion of Indigenous babies born within the previous 12 months who attended the **funded organisation** more than once, and whose birthweight was recorded. Presented as a percentage. Birthweight: defined as the first weight of a baby obtained after birth. Include only live births. Exclude unknown birthweight. The birthweight is to be taken from the baby's client record where available. Where the birthweight is not recorded in the baby's client record, the mother's record may be used as a source of birth details. The weight recorded must be the baby's weight at birth. Attended the organisation more than once: count attendance using the baby's client record only. Exclude babies who only attended before birth as part of the mother's antenatal care. Previous 12 months: refers to the previous financial year or previous calendar year. Include: results arising from measurements conducted outside of the organisation that are known by the organisation. For example, birthweight recorded in the baby's medical record at the organisation, or received from sharing client data with other organisations, such as a hospital.
Computation:	(Numerator ÷ Denominator) x 100
Numerator:	Number of Indigenous babies born within the previous 12 months who attended the funded organisation more than once, and whose birthweight was recorded.

Numerator data elements:

Data Element / Data Set

Person—Indigenous status, code N

Data Source

Aboriginal and Torres Strait Islander specific primary health care national Key Performance Indicators (nKPI) data collection

NMDS / DSS

Indigenous-specific primary health care NBEDS June 2021

Guide for use

The baby is considered Indigenous if one or both parents identify as Indigenous.

Data Element / Data Set

Product of birth—birth status, code N

Data Source

Aboriginal and Torres Strait Islander specific primary health care national Key Performance Indicators (nKPI) data collection

NMDS / DSS

Indigenous-specific primary health care NBEDS June 2021

Guide for use

Only live births are included.

Data Element / Data Set

Person—birthweight recorded indicator, yes/no code N

Data Source

Aboriginal and Torres Strait Islander specific primary health care national Key Performance Indicators (nKPI) data collection

NMDS / DSS

Indigenous-specific primary health care NBEDS June 2021

Guide for use

Birthweight recorded only.

Denominator:

Total number of Indigenous babies born within the previous 12 months who attended the funded organisation more than once.

Denominator data elements:
