Enquiries or comments on the METEOR metadata or download should be directed to the METEOR team at meteor@aihw.gov.au.

Find metadata

[Getting started](#)[Data set specifications](#)[Indicator sets](#)[Data quality statements](#)[Data dictionary archives](#)

There are multiple ways you can browse and search the metadata standards in METEOR.

To find your way around METEOR, head over to the [search](#) page. You can browse by sector by selecting the registration authority you're interested in and the 'Standard' registration status, and leaving the search box blank.

If you know what you're looking for, [search](#) is still the way to go, only you can search on keywords and use the filters provided to search by metadata type, status, registration date, and many other options.

You may find the lists of [frameworks](#) and [indicator sets](#) useful. METEOR also has [object class specialisations](#) and [property groups](#) to help you with navigation.

You might find our [Metadata management](#) section helpful if you need more information about metadata standards and registration authorities.

If you're not sure what type of metadata you're looking for, or the details of what they are, head over to the [Learn about metadata](#) section of our website.
