Steward: Australian Institute of Health and Welfare

Data element attributes

Collection and usage attributes

Guide for use: Family composition is at the time of the placement of the adopted child in to the

adoptive family.

If a family adopted more than one child during the reporting period, the family should be counted separately for each adoption. This includes multiple and serial

adoptions.

The composition of an adoptive family includes both resident and non-resident children. Jurisdictions that do not collect data on non-resident children, should

include a note to this effect.
