Specialised mental health service—ambulatory service unit name, text XXX[X(97)]

Identifying and definitional attributes

Metadata item type:	Data Element
Short name:	Ambulatory mental health service unit name
METEOR identifier:	750374
Registration status:	Health , Standard 17/12/2021
Definition:	The appellation by which a specialised mental health ambulatory service unit is known or called, as represented by text.
Data Element Concept:	Specialised mental health service—ambulatory service unit name
Value Domain:	Text XXX[X(97)]

Value domain attributes

Representational attributes

Representation class:	Text
Data type:	String
Format:	XXX[X(97)]
Maximum character length:	100

Data element attributes

Collection and usage attributes

Guide for use:	For the ambulatory service setting, the service unit is equivalent to an organisation's ambulatory services as a whole. However, ambulatory service units should be differentiated by target population. Where an organisation provides multiple teams serving the same target population, these may be grouped and reported as a single service unit or identified as individual service units in their own right. Ambulatory services would be separately identifiable as service units using the Specialised mental health service—target population group, code N data element. For additional information, refer to the glossary item Ambulatory mental health care service . The Ambulatory service unit name should be unique for the service unit in that state/territory. Service unit reporting structures should be identical between all mental health collections (e.g., Mental Health National Minimum Data Sets and the Mental Health National Outcomes and Casemix Collection (NOCC)).
