# Patient episode of Staphylococcus aureus bloodstream infection—Staphylococcus aureus methicillin susceptibility indicator

# Identifying and definitional attributes

Metadata item type: Data Element Concept

**Synonymous names:** SABSI methicillin susceptibility

METEOR identifier: 752256

Registration status: Health, Standard 09/12/2022

**Definition:** An indicator of whether the *Staphylococcus aureus* bloodstream infection (SABSI)

isolate is susceptible to oxacillin or methicillin (cefoxitin) in a patient episode of

Staphylococcus aureus bloodstream infection.

# **Object Class attributes**

# Identifying and definitional attributes

Object class: Patient episode of Staphylococcus aureus bloodstream infection

Definition: An episode of healthcare-associated Staphylococcus aureus bloodstream

infection (SABSI) that arises from an episode of admitted patient care in an

Australian hospital.

Specialisation of: Service episode
