Variations of sex characteristics code N

Identifying and definitional attributes

Metadata item type:	Value Domain
METEOR identifier:	757694
Registration status:	Health, Qualified 03/06/2022
Definition:	A code set representing a person's self-reported knowledge of being born with variations of sex characteristics .

Representational attributes

Representation class:	Code
Data type:	Number
Format:	N
Maximum character length:	1

	Value	Meaning
Permissible values:	1	Yes
	2	No
	3	Don't know
	4	Prefer not to say
Supplementary values:	7	Not applicable
	9	Not stated/inadequately described

Collection and usage attributes

Guide for use:

This Value Domain is based on the ABS (Australian Bureau of Statistics) Standard for sex, gender, variations of sex characteristics and sexual orientation variables (ABS 2021). The values are defined as:

CODE 1 Yes

Persons who know they were born with a variation of sex characteristics.

CODE 2 No

Persons who know they were not born with a variation of sex characteristics.

CODE 3 Don't know

Persons who do not know if they were born with a variation of sex characteristics.

CODE 4 Prefer not to say

Persons who prefer not to respond on whether or not they were born with a variation of sex characteristics.

CODE 7 Not applicable

This supplementary value is for use in cases where the data is not self-reported. (Note the ABS uses the Code 0 for this value.)

CODE 9 Not stated/inadequately described

This supplementary value is used to code inadequately described responses and non-responses for variations of sex characteristics. It is not to be used on primary collection forms. It is primarily for use in administrative collections when transferring data from data sets where the item is not collected.

Alternative codes

The ABS Standard also allows for the following alternative codes, which can be mapped to the codes specified above:

CODE Y Yes

CODE N No

CODE U Don't know

CODE Z Prefer not to answer
