Birth event—birth method, code N

Exported from METEOR (AIHW's Metadata Online Registry)

Birth event—birth method, code N

Identifying and definitional attributes

Metadata item type:	Data Element
Short name:	Method of birth
METEOR identifier:	762173
Registration status:	Health, Standard 09/12/2022 Tasmanian Health, Standard 08/11/2023
Definition:	The method of complete expulsion or extraction of a product of conception from the female in a birth event, as represented by a code.
Context:	Perinatal

Data element concept attributes

Identifying and definitional attributes

Data element concept:	Birth event—birth method
METEOR identifier:	695369
Registration status:	Health, Standard 12/12/2018 Tasmanian Health, Standard 08/11/2023
Definition:	The method of complete expulsion or extraction of a product of conception from the female in a birth event.
Context:	Perinatal
Object class:	Birth event
Property:	Birth method

Value domain attributes

Identifying and definitional attributes

Value domain:	Method of birth code N
METEOR identifier:	696190
Registration status:	Health, Standard 12/12/2018 Tasmanian Health, Standard 08/11/2023
Definition:	A code set representing the method of complete expulsion or extraction from a female of a product of conception.

Representational attributes

Representation class:	Code	
Data type:	Number	
Format:	N	
Maximum character length:	1	
	Value	**Meaning**
Permissible values:	1	Vaginal—non-instrumental
	2	Vaginal—forceps
	4	Caesarean section

	5	Vaginal—vacuum extraction
Supplementary values:	9	Not stated/inadequately described

Source and reference attributes

Submitting organisation: National Perinatal Data Development Committee

Data element attributes

Collection and usage attributes

Guide for use:

CODE 1   Vaginal—non-instrumental

Includes a vaginal breech that has been manually rotated.

CODE 2   Vaginal—forceps

Includes a vaginal breech with forceps to the after-coming head.

CODE 4   Caesarean section

Includes the use of forceps/vacuum extraction to assist the extraction of the product of conception in a caesarean section or where a hysterotomy is performed to extract the product of conception.

This data element should be recorded in conjunction with the [Birth event—anaesthesia administered indicator, yes/no/not stated/inadequately described code N](#) data element when method of birth is Code 2 (Vaginal—forceps), Code 4 (Caesarean section) or Code 5 (Vaginal—vacuum extraction).

This data element should be recorded in conjunction with the [Birth event—type of anaesthesia administered, code N[N]](#) data element when method of birth is Code 2 (Vaginal—forceps), Code 4 (Caesarean section) or Code 5 (Vaginal— vacuum extraction) and [Birth event—anaesthesia administered indicator, yes/no/not stated/inadequately described code N](#) is Code 1 (Yes).

This data element should be recorded in conjunction with the [Birth event—main indication for caesarean section, code N[N]](#) data element when method of birth is Code 4 (Caesarean section).

This data element should be recorded in conjunction with the [Birth event—additional indication for caesarean section, code N[N]](#) data element when method of birth is Code 4 (Caesarean section), [Birth event—main indication for caesarean section, code N[N]](#) is completed and there is more than one reason for which a caesarean was performed.

Vaginal birth with vacuum extraction assistance.

Comments:

Code 3 (Vaginal breech) was omitted from this data element in 2006 and is no longer in use. For information about its meaning in previous data elements, see superseded versions. Information on 'Vaginal breech' births is recorded in the data element [Birth event—birth presentation, code N](#)
