Stillbirth Clinical Care Standard: 3c- Proportion of women who gave birth who reported from 28 weeks gestation that they knew how to monitor their fetal movements and what to do if they were concerned about a change in their fetal movements

Identifying and definitional attributes

Metadata item type:	Indicator
Indicator type:	Indicator
Short name:	3c- Proportion of women who gave birth who reported from 28 weeks gestation that they knew how to monitor their fetal movements and what to do if they were concerned about a change in their fetal movements
METEOR identifier:	766650
Registration status:	Australian Commission on Safety and Quality in Health Care, Standard 04/11/2022
Description:	Proportion of women who gave birth who reported from 28 weeks gestation that they knew how to monitor their fetal movements and what to do if they were concerned about a change in their fetal movements.
Indicator set:	Stillbirth Clinical Care Standard Australian Commission on Safety and Quality in Health Care, Standard 04/11/2022

Collection and usage attributes

Computation description:	Knowledge can be assessed through the teach-back, also called the show-me method, or a local questionnaire. The outcome of any assessment of understanding should be documented in the medical record. Presented as a percentage.
Computation:	$(\text{Numerator} \div \text{Denominator}) \times 100$
Numerator:	The number of women in the denominator who reported they knew how to monitor their fetal movements and what to do if they were concerned about a change in their fetal movements.
Denominator:	The number of women who gave birth from 28 weeks gestation.
Comments:	This indicator is based on an indicator from the Safer Baby Bundle. Further details about the Safer Baby Bundle can be found at https://stillbirthcare.org.au/wp-content/uploads/2021/03/SBB-Handbook_Final-1.pdf

Representational attributes

Representation class:	Percentage
Data type:	Real
Unit of measure:	Service event
Format:	N[NN]

Accountability attributes

Reporting requirements:	These indicators are for local quality improvement. Monitoring the implementation of the Stillbirth Clinical Care Standard (ACSQHC, 2022) will assist in meeting some of the requirements of the National Safety and Quality Health Service Standards (ACSQHC, 2021).
--------------------------------	---

Organisation responsible for providing data: Not applicable

Accountability: Not applicable

Other issues caveats: Applicable settings: Primary care settings and hospitals where maternity care is provided.

Release date: 05/11/2022
