Indigenous-specific primary health care: PI01a-Number of Indigenous babies born within the previous 12 months who attended the organisation more than once, and who have birthweight recorded, June 2022

Identifying and definitional attributes

Metadata item type:	Indicator
Indicator type:	Output measure
Short name:	PI01a-Number of Indigenous babies born within the previous 12 months who attended the organisation more than once, and who have birthweight recorded, June 2022
METEOR identifier:	770366
Registration status:	Indigenous, Superseded 27/08/2023
Description:	Number of Indigenous babies born within the previous 12 months who attended the **funded organisation** more than once, and whose **birthweight** was recorded.
Rationale:	Birthweight is a key indicator of a baby's immediate health and a determinant of their future health. Measuring birthweight allows infants to be given early and suitable intervention, which can mitigate adverse outcomes.
Indicator set:	Indigenous-specific primary health care national key performance indicators June 2022 Indigenous, Superseded 27/08/2023

Collection and usage attributes

Computation description:	Count of Indigenous babies born within the previous 12 months who attended the funded organisation more than once, and whose birthweight was recorded. Presented as a number. Birthweight: defined as the first weight of a baby obtained after birth. Include only live births. Exclude unknown birthweight. The birthweight is to be taken from the baby's client record where available. Where the birthweight is not recorded in the baby's client record, the mother's record may be used as a source of birth details. The weight recorded must be the baby's weight at birth. Attended the organisation more than once: count attendance using the baby's client record only. Exclude babies who only attended before birth as part of the mother's antenatal care. Previous 12 months: refers to the previous financial year or previous calendar year. Include: results arising from measurements conducted outside of the organisation that are known by the organisation. For example, birthweight recorded in the baby's medical record at the organisation, or received from sharing client data with other organisations, such as a hospital.
Computation:	Numerator only.
Numerator:	Number of Indigenous babies born within the previous 12 months who attended the funded organisation more than once, and whose birthweight was recorded.

Numerator data elements:

Data Element / Data Set

Service provider organisation—number of service contacts, total N[NNNNN]

Data Source

Aboriginal and Torres Strait Islander specific primary health care national Key Performance Indicators (nKPI) data collection

NMDS / DSS

Indigenous-specific primary health care NBEDS June 2022

Guide for use

Babies are included if they had more than one service contact.

Data Element / Data Set

Person—Indigenous status, code N

Data Source

Aboriginal and Torres Strait Islander specific primary health care national Key Performance Indicators (nKPI) data collection

NMDS / DSS

Indigenous-specific primary health care NBEDS June 2022

Guide for use

The baby is considered Indigenous if one or both parents identify as Indigenous.

Data Element / Data Set

Product of birth—birth status, code N

Data Source

Aboriginal and Torres Strait Islander specific primary health care national Key Performance Indicators (nKPI) data collection

NMDS / DSS

Indigenous-specific primary health care NBEDS June 2022

Guide for use

Only live births are included.

Data Element / Data Set

Person—birthweight recorded indicator, yes/no code N

Data Source

Aboriginal and Torres Strait Islander specific primary health care national Key Performance Indicators (nKPI) data collection

NMDS / DSS

Indigenous-specific primary health care NBEDS June 2022

Guide for use

Birthweight recorded only.

Comments: Census date for reporting is 30 June 2022.

Representational attributes

Representation class: Count

Data type: Real

Unit of measure: Person

Format: N[N(6)]

Indicator conceptual framework

Framework and dimensions: Health Conditions

Data source attributes

Data sources:

Data Source
