National Core Maternity Indicators: PI 07–Non-instrumental vaginal birth for selected females giving birth for the first time, 2023

Identifying and definitional attributes

Metadata item type:	Indicator
Indicator type:	Indicator
Common name:	Non-instrumental vaginal birth for selected females giving birth for the first time
Short name:	PI 07–Non-instrumental vaginal birth for selected females giving birth for the first time, 2023
METEOR identifier:	772615
Registration status:	Health , Superseded 29/05/2024
Description:	The proportion of selected females giving birth for the first time who gave birth by non-instrumental vaginal birth.
Rationale:	This indicator is used to benchmark practice.
Indicator set:	National Core Maternity Indicators, 2023 Health , Superseded 29/05/2024

Collection and usage attributes

Population group age from:	20 years					
Population group age to:	34 years					
Computation description:	<p>The number of selected females giving birth for the first time who gave birth by non-instrumental vaginal birth, divided by all selected females, and multiplied by 100.</p> <p>Selected females criteria: Females included are those who gave birth for the first time and met all of the following criteria:</p> <ul style="list-style-type: none">• aged between 20 and 34• gestational age at birth between 37 and 40 completed weeks• pregnancy had one baby only (singleton)• the presentation of the baby was vertex (baby's head was at the cervix). <p>Excluded are those females who had given birth prior to the current birth or who did not meet the selection criteria.</p> <p>A birth is defined as the complete expulsion or extraction from a female, of a product of conception of 20 or more completed weeks of gestation or of 400 grams or more birthweight.</p> <p>A non-instrumental vaginal birth is one in which the baby is born through the vagina without the assistance of instruments (vacuum or forceps).</p>					
Computation:	$100 \times (\text{Numerator} \div \text{Denominator})$					
Numerator:	The number of selected females giving birth for the first time who gave birth by non-instrumental vaginal birth.					
Numerator data elements:	<table border="1"><thead><tr><th>Data Element / Data Set</th></tr></thead><tbody><tr><td>Person—date of birth, DDMMYYYY</td></tr><tr><td>Data Source</td></tr><tr><td>Perinatal National Minimum Data Set (NMDS)</td></tr><tr><td>NMDS / DSS</td></tr></tbody></table>	Data Element / Data Set	Person—date of birth, DDMMYYYY	Data Source	Perinatal National Minimum Data Set (NMDS)	NMDS / DSS

Disaggregation:

- Year of birth
- State or territory of birth
- Hospital annual number of births
- Indigenous status of mother
- Hospital sector
- Remoteness category (from mother's area of usual residence)
- Socioeconomic area (Index of Relative Socio-economic Disadvantage from mother's area of usual residence)
- Primary health network (from mother's area of usual residence)
- Statistical local area 3 (from mother's area of usual residence)

Comments:

Data elements are from the Perinatal National Minimum Data Set (NMDS) or have been provided as voluntary non-standardised items by the states and territories. Records with a permissible value have been included in the denominator.

For Tasmania prior to 2012, presentations via caesarean births were not reported by hospitals still using paper-based forms. Where a caesarean section occurred the presentation was recorded as 'Not stated'. Presentations via caesarean births was included in the paper-based form from 1 January 2013. As a result, Tasmania can only be reported 2013 onwards for selected females. Data for parity were not available from Victoria in 2009. As a result 2009 data for selected females cannot be reported for Victoria.

In 2022, the selected females criteria were updated to revise gestational age at birth range to between 37 and 40 completed weeks gestation (previously between 37 and 41 completed weeks gestation).

Source of definition: Australian Council on Healthcare Standards (ACHS) Indicator 1.1: Selected women giving birth for the first time who have a spontaneous vaginal birth. The ACHS defines a spontaneous vaginal birth as a vaginal birth, regardless of onset of labour, which is not assisted by forceps or vacuum and is not a vaginal breech delivery. This ACHS indicator is based on the definition by Women's Healthcare Australasia Core Maternity Indicators Project (WHA 2007).

Representational attributes

Representation class: Percentage

Data type: Real

Unit of measure: Person

Format: N[NN.N]
