Person with cancer—region of first recurrence as distant metastasis, topography code (ICD-O-3.2) ANN.N

Identifying and definitional attributes

Metadata item type:	Data Element
Short name:	Region of first recurrence as distant metastasis
METEOR identifier:	775183
Registration status:	Health , Qualified 03/08/2023
Definition:	The region of first recurrence as a distant metastasis in a person with cancer, after a disease-free period, as represented by an ICD-O-3.2 code.
Data Element Concept:	Person with cancer—region of first recurrence as distant metastasis
Value Domain:	Topography code (ICD-O-3.2) ANN.N

Value domain attributes

Representational attributes

Classification scheme:	International Classification of Diseases for Oncology 3rd edition, 2nd revision
Representation class:	Code
Data type:	String
Format:	ANN.N
Maximum character length:	5

Collection and usage attributes

Guide for use:	Record all four alphanumeric characters of the topography code. The number after the decimal point represents the subsite or subcategory.

Data element attributes

Collection and usage attributes

Guide for use:	<p>This information is collected for the site or region of first recurrence as distant metastasis.</p> <p>The term recurrence refers to the return, reappearance or metastasis of cancer of the same histology after a disease-free period.</p> <p>Distant metastasis refers to the spread of cancer of the same histology as the original (primary) tumour to distant organs or distant lymph nodes.</p> <p>Site or region refers to the anatomical location that the cancer has spread to.</p> <p>Distant metastasis may occur in more than one site; record all relevant distant metastatic sites.</p> <p>The region of locoregional recurrence is collected as a separate item.</p> <p>The record should not be updated with subsequent recurrences.</p>
Collection methods:	The information should be obtained from the patient's medical record.
Comments:	This is collected to identify in which anatomical structures recurrence occurs, and is useful for evaluating patterns of care and patient outcomes.
