# Person with cancer—region of first recurrence as locoregional cancer, topography code (ICD-O-3.2) ANN.N

## Exported from METEOR (AIHW's Metadata Online Registry)

# Person with cancer—region of first recurrence as locoregional cancer, topography code (ICD-O-3.2) ANN.N

## Identifying and definitional attributes

| | |
|---|---|
| **Metadata item type:** | Data Element |
| **Short name:** | Region of first recurrence as locoregional cancer |
| **METEOR identifier:** | 775187 |
| **Registration status:** | Health, Qualified 03/08/2023 |
| **Definition:** | The region of first recurrence as locoregional cancer in a person with cancer, after a disease-free period, as represented by an ICD-O-3.2 code. |
| **Data Element Concept:** | Person with cancer—region of first recurrence as locoregional cancer |
| **Value Domain:** | Topography code (ICD-O-3.2) ANN.N |

## Value domain attributes

### Representational attributes

| | |
|---|---|
| **Classification scheme:** | International Classification of Diseases for Oncology 3rd edition, 2nd revision |
| **Representation class:** | Code |
| **Data type:** | String |
| **Format:** | ANN.N |
| **Maximum character length:** | 5 |

### Collection and usage attributes

| | |
|---|---|
| **Guide for use:** | Record all four alphanumeric characters of the topography code. The number after the decimal point represents the subsite or subcategory. |

### Source and reference attributes

| | |
|---|---|
| **Submitting organisation:** | Australian Institute of Health and Welfare |
| **Origin:** | World Health Organization. (2020). International classification of diseases for oncology (ICD-O), 3rd ed., 2nd revision. World Health Organization. http://www.iacr.com.fr/images/Newsflash/ICD-O-3.2_final_update09102020.xls |

## Data element attributes

### Collection and usage attributes

| **Guide for use:** | This information is collected for the site or region of the first recurrence as locoregional cancer. |
| | |

**Guide for use:**    This information is collected for the site or region of the first recurrence as locoregional cancer.

The term recurrence refers to the return, reappearance or metastasis of cancer of the same histology after a disease-free period.

Locoregional recurrence refers to the appearance of cancer cells at the same site as the original (primary) tumour or the regional lymph nodes. A list of those lymph nodes defined as regional lymph nodes for each cancer site can be found in the TNM Classification of Malignant Tumours International Union Against Cancer (UICC) and the American Joint Committee on Cancer (AJCC) Cancer Staging Manual; the latest editions are recommended.

Site or region refers to the anatomical position that the cancer has reappeared, record all relevant locoregional sites.

The region of recurrence of distant metastasis is collected as a separate item.

The record should not be updated with subsequent recurrences.

**Collection methods:**    The information should be obtained from the patient's medical record.

**Comments:**    This is collected to identify in which anatomical structures recurrence occurs, and is useful for evaluating patterns of care and patient outcomes.
