Workgroups

Exported from METEOR (AIHW's Metadata Online Registry)

Workgroups

Workgroups are the cornerstone of metadata management in METEOR. Workgroup Managers and Registration Authorities play a vital role in overseeing Workgroup details and facilitating access for users to view and develop metadata assets.

Access to Workgroups is essential for metadata management. If you need access to a Workgroup and do not have a Registration Authority or Workgroup Manager to contact, our site offers a Contact Form to provide assistance.

How do I get access to Workgroups?

Contact a Workgroup Manager or reach out to METEOR Admins via our Contact form with the Workgroup name and Access level you require.

Access Levels to Workgroups

Registration Authority:

- Endorsement of Public Metadata.
- Endorsement of Workgroup metadata.
- Workgroup Manager access.
