Relational attributes

Select the code which best characterises the management or ownership status of the place where the person was situated when the injury occurred, on the basis of the information available at the time it is recorded. If two or more categories are judged to be equally appropriate, select the one that comes first in the code list.

Note, a venue may be owned by one party (e.g. a State government) and managed by another (e.g. a sports federation). Select the party with most direct operational control over the venue – usually the managing body.
