Person—regular client indicator, yes/no code N

Identifying and definitional attributes

Metadata item type:	Data Element
Short name:	Regular client indicator
METEOR identifier:	777814
Registration status:	Indigenous , Standard 12/06/2023
Definition:	An indicator of whether a person is a regular client of an organisation or agency, as represented by a code.
Data Element Concept:	Person—regular client indicator
Value Domain:	Yes/no code N

Value domain attributes

Representational attributes

Representation class:	Code	
Data type:	Boolean	
Format:	N	
Maximum character length:	1	
	Value	Meaning
Permissible values:	1	Yes
	2	No

Source and reference attributes

Submitting organisation:	Australian Institute of Health and Welfare
--------------------------	--

Data element attributes

Collection and usage attributes

Guide for use:	CODE 1 Yes
	A person is a regular client of the organisation or agency.
	CODE 2 No
	A person is not a regular client of the organisation or agency.
	The definition of a regular client does not include deceased patients.
Collection methods:	A person can be a regular client with one or more organisations or agencies and therefore may be counted more than once.
	The definition of a regular client can vary depending on the context and/or collection in which the term is being applied, but generally involves a minimum number of visits to an organisation or agency or uses of a facility, occurring over a specific period of time. For example, in the primary health care context a regular client may be someone who has visited a particular primary health care provider 3 or more times in the last 2 years.
	In some collections, visits may be referred to as client or service contacts.
