Indigenous-specific primary health care national key performance indicators December 2022

Identifying and definitional attributes

Metadata item type: Indicator Set

Indicator set type: Other

METEOR identifier: 779009

Registration status: [Indigenous](#), Superseded 18/12/2023

Description: As part of the National Indigenous Reform Agreement (NIRA), the (then) Council of Australian Governments (COAG) agreed that the (then) Australian Government Department of Health and Ageing (DoHA), in partnership with the state and territory health departments and in collaboration with the Australian Institute of Health and Welfare (AIHW), would develop a set of Key Performance Indicators for Indigenous-specific primary health care organisations.

The purpose of the Indigenous-specific primary health care National Key Performance Indicators (nKPIs) is to provide reporting organisations with data that they can use for continuous quality improvement (CQI) and are based on best practice/clinical guidelines in three areas which are important for Indigenous health:

- maternal and child health
- preventative health
- chronic disease management.

The data are also used at a national level to support policy, planning and progress (for example to consider progress against the COAG Closing the Gap targets, and support the national health goals set out in the National Aboriginal and Torres Strait Islander Health Plan 2021–2031).

The population of interest in the nKPIs is the [Indigenous regular client](#) population of Indigenous-specific primary health care organisations or maternal and child health programs/services funded by the Department of Health and Aged Care (DHAC) under its Indigenous Australians' Health Programme (IAHP), referred to as [funded organisations](#).

[Indigenous-specific primary health care: PI19a-Number of Indigenous regular clients with a selected chronic disease who have a kidney function result within a specified category, December 2022](#)

[Indigenous](#), Superseded 18/12/2023

[Indigenous-specific primary health care: PI19b-Proportion of Indigenous regular clients with a selected chronic disease who have a kidney function result within a specified category, December 2022](#)

[Indigenous](#), Superseded 18/12/2023

[Indigenous-specific primary health care: PI20a-Number of Indigenous regular clients who have the necessary risk factors recorded to assess absolute cardiovascular disease \(CVD\) risk, December 2022](#)

[Indigenous](#), Superseded 18/12/2023

[Indigenous-specific primary health care: PI20b-Proportion of Indigenous regular clients who have the necessary risk factors recorded to assess absolute cardiovascular disease \(CVD\) risk, December 2022](#)

[Indigenous](#), Superseded 18/12/2023

[Indigenous-specific primary health care: PI21a-Number of Indigenous regular clients who have an absolute cardiovascular disease \(CVD\) risk assessment result within a specified level, December 2022](#)

[Indigenous](#), Superseded 18/12/2023

[Indigenous-specific primary health care: PI21b-Proportion of Indigenous regular clients who have an absolute cardiovascular disease \(CVD\) risk assessment result within a specified level, December 2022](#)

[Indigenous](#), Superseded 18/12/2023

[Indigenous-specific primary health care: PI22a-Number of female Indigenous regular clients who have a cervical screening \(HPV\) test, December 2022](#)

[Indigenous](#), Superseded 18/12/2023

[Indigenous-specific primary health care: PI22b-Proportion of female Indigenous regular clients who have a cervical screening \(HPV\) test, December 2022](#)

[Indigenous](#), Superseded 18/12/2023

[Indigenous-specific primary health care: PI23a-Number of Indigenous regular clients with type 2 diabetes who have a blood pressure measurement result recorded, December 2022](#)

[Indigenous](#), Superseded 18/12/2023

[Indigenous-specific primary health care: PI23b-Proportion of Indigenous regular clients with type 2 diabetes who have a blood pressure measurement result recorded, December 2022](#)

[Indigenous](#), Superseded 18/12/2023

[Indigenous-specific primary health care: PI24a-Number of Indigenous regular clients with type 2 diabetes who have a blood pressure measurement result within a specified category, December 2022](#)

[Indigenous](#), Superseded 18/12/2023

[Indigenous-specific primary health care: PI24b-Proportion of Indigenous regular clients with type 2 diabetes who have a blood pressure measurement result within a specified category, December 2022](#)

[Indigenous](#), Superseded 18/12/2023

[Indigenous-specific primary health care: PI25a-Number of Indigenous regular clients who have a test for one or more sexually transmissible infections, December 2022](#)

[Indigenous](#), Superseded 18/12/2023

[Indigenous-specific primary health care: PI25b-Proportion of Indigenous regular clients who have a test for one or more sexually transmissible infections, December 2022](#)

[Indigenous](#), Superseded 18/12/2023

Collection and usage attributes

National reporting arrangement:

Each organisation funded by the DHAC that is required to provide data to the nKPIs should record service provision in clinical information management systems that allow the electronic transmission of data for the [Indigenous-specific primary health care national best endeavours data set](#) (ISPHC NBEDS), to be used in the calculation of the indicators. Exceptions may be made for organisations that do not have compatible clinical information management systems to manually upload data.

Reporting organisations provide nKPI data twice a year, with the census dates of 30 June and 31 December. Data submission is conducted via the Health Data Portal.

Implementation start date: 01/07/2022

Implementation end date: 31/12/2022

Comments: This indicator set relates to the 6 month period from 1 July 2022 to 31 December 2022; however, the period of data covered varies by indicator.
