Indigenous-specific primary health care: PI02a- Number of Indigenous babies born within the previous 12 months who attended the organisation more than once, and who have a birthweight result within a specified category, December 2022

Identifying and definitional attributes

Metadata item type:	Indicator
Indicator type:	Output measure
Short name:	PI02a-Number of Indigenous babies born within the previous 12 months who attended the organisation more than once, and who have a birthweight result within a specified category, December 2022
METEOR identifier:	779030
Registration status:	Indigenous , Superseded 18/12/2023
Description:	<p>Number of Indigenous babies born within the previous 12 months who attended the funded organisation more than once, and whose birthweight result was:</p> <ul style="list-style-type: none">• low (less than 2,500 grams)• normal (2,500 grams to less than 4,500 grams)• high (4,500 grams and over).
Rationale:	Birthweight is a key indicator of a baby's immediate health and a determinant of their future health. Measuring birthweight allows infants to be given early and suitable intervention, which can mitigate adverse outcomes.
Indicator set:	Indigenous-specific primary health care national key performance indicators December 2022 Indigenous , Superseded 18/12/2023

Collection and usage attributes

Computation description:	<p>Count of Indigenous babies born within the previous 12 months who attended the funded organisation more than once, and whose birthweight result was:</p> <ul style="list-style-type: none">• low (less than 2,500 grams)• normal (2,500 grams to less than 4,500 grams)• high (4,500 grams and over). <p>Presented as a number.</p> <p>Birthweight: defined as the first weight of a baby obtained after birth. Include only live births. Exclude unknown birthweight. The birthweight is to be taken from the baby's client record where available. Where the birthweight is not recorded in the baby's client record, the mother's record may be used as a source of birth details. The weight recorded must be the baby's weight at birth.</p> <p>Attended the organisation more than once: count attendance using the baby's client record only. Exclude babies who only attended before birth as part of the mother's antenatal care.</p> <p>Previous 12 months: refers to the previous financial year or previous calendar year.</p> <p>Include: results arising from measurements conducted outside of the organisation that are known by the organisation. For example, birthweight recorded in the baby's medical record at the organisation, or received from sharing client data with other organisations, such as a hospital.</p>
Computation:	Numerator only.

Numerator:

Calculation A: Number of Indigenous babies born within the previous 12 months who attended the funded organisation more than once, and whose birthweight result was categorised as low (less than 2,500 grams).

Calculation B: Number of Indigenous babies born within the previous 12 months who attended the funded organisation more than once, and whose birthweight result was categorised as normal (2,500 grams to less than 4,500 grams).

Calculation C: Number of Indigenous babies born within the previous 12 months who attended the funded organisation more than once, and whose birthweight result was categorised as high (4,500 grams and over).

Numerator data elements:

Data Element / Data Set

[Service provider organisation—number of service contacts, total N\[NNNNN\]](#)

Data Source

[Aboriginal and Torres Strait Islander specific primary health care national Key Performance Indicators \(nKPI\) data collection](#)

NMDS / DSS

[Indigenous-specific primary health care NBEDS December 2022](#)

Guide for use

Babies are included if they had more than one service contact.

Data Element / Data Set

[Person—Indigenous status, code N](#)

Data Source

[Aboriginal and Torres Strait Islander specific primary health care national Key Performance Indicators \(nKPI\) data collection](#)

NMDS / DSS

[Indigenous-specific primary health care NBEDS December 2022](#)

Guide for use

The baby is considered Indigenous if one or both parents identify as Indigenous.

Data Element / Data Set

[Product of birth—birthweight, code N](#)

Data Source
