# Indigenous-specific primary health care: PI12a- Number of Indigenous regular clients who have a BMI result within a specified category, December 2022

## Identifying and definitional attributes

<b>Metadata item type:</b>	Indicator
<b>Indicator type:</b>	Output measure
<b>Short name:</b>	PI12a-Number of Indigenous regular clients who have a BMI result within a specified category, December 2022
<b>METEOR identifier:</b>	779072
<b>Registration status:</b>	<a href="#">Indigenous</a> , Superseded 18/12/2023
<b>Description:</b>	<p>Number of <a href="#">Indigenous regular clients</a> aged 18 and over who had their body mass index (BMI) classified as:</p> <ul style="list-style-type: none"><li>• underweight (&lt;18.50)</li><li>• normal (18.50–24.99)</li><li>• overweight (25.00–29.99)</li><li>• obese (≥30.00)</li><li>• not calculated</li></ul> <p>within the previous 24 months.</p>
<b>Rationale:</b>	Excess weight, especially obesity, is a major risk factor for developing chronic disease. As the level of excess weight increases, so does the risk of developing these conditions. In addition, being overweight or obese can hamper the ability to control or manage chronic diseases.
<b>Indicator set:</b>	<a href="#">Indigenous-specific primary health care national key performance indicators December 2022</a> <a href="#">Indigenous</a> , Superseded 18/12/2023

## Collection and usage attributes

<b>Population group age from:</b>	18 years and over.
-----------------------------------	--------------------

**Computation description:** Number of Indigenous regular clients aged 18 and over who had their BMI classified as:

- underweight (<18.50)
- normal (18.50–24.99)
- overweight (25.00–29.99)
- obese (≥30.00)
- not calculated

within the previous 24 months.

Presented as a number.

Calculated separately for each BMI classification.

BMI: A measure of an adult's weight (body mass) relative to height used to assess the extent of weight deficit or excess where height and weight have been measured. BMI is the weight in kilograms divided by the square of the height in metres (WHO 2017).

If the client had their BMI recorded more than once within the previous 24 months, include only the most recently recorded result.

Only include clients whose BMI was classified using a height measurement taken since the client turned 18 and a weight measurement taken within the previous 24 months.

BMI cannot be calculated if components necessary for its calculation (weight or height) are unknown or have not been collected.

BMI not calculated: includes clients with neither height nor weight recorded, as well as those with invalid height and/or weight recorded.

**Computation:**

Numerator only.

**Numerator:**

Calculation A: Number of Indigenous regular clients aged 18 and over who had their BMI classified as underweight within the previous 24 months.

Calculation B: Number of Indigenous regular clients aged 18 and over who had their BMI classified as normal weight within the previous 24 months.

Calculation C: Number of Indigenous regular clients aged 18 and over who had their BMI classified as overweight within the previous 24 months.

Calculation D: Number of Indigenous regular clients aged 18 and over who had their BMI classified as obese within the previous 24 months.

Calculation E: Number of Indigenous regular clients aged 18 and over who did not have their BMI calculated within the previous 24 months.

**Numerator data elements:**

**Data Element / Data Set**

[Person—body mass index \(classification\), code N{,N}](#)

**Data Source**

[Aboriginal and Torres Strait Islander specific primary health care national Key Performance Indicators \(nKPI\) data collection](#)

**NMDS / DSS**

[Indigenous-specific primary health care NBEDS December 2022](#)

**Guide for use**

Only include the underweight, normal, overweight, obese and not stated/inadequately described classifications.

Only include those client's whose BMI was classified using a height measurement taken since the client turned 18 and a weight measurement taken within the previous 24 months.

**Data Element / Data Set**

[Person—age, total years N\[NN\]](#)

**Data Source**

[Aboriginal and Torres Strait Islander specific primary health care national Key Performance Indicators \(nKPI\) data collection](#)

**NMDS / DSS**

[Indigenous-specific primary health care NBEDS December 2022](#)

**Guide for use**

Aged 18 and over only.

**Data Element / Data Set**

[Person—Indigenous status, code N](#)

**Data Source**

[Aboriginal and Torres Strait Islander specific primary health care national Key Performance Indicators \(nKPI\) data collection](#)

**NMDS / DSS**

[Indigenous-specific primary health care NBEDS December 2022](#)

**Guide for use**

Indigenous only.

**Data Element / Data Set**

[Person—regular client indicator, yes/no code N](#)

**Data Source**

[Aboriginal and Torres Strait Islander specific primary health care national Key Performance Indicators \(nKPI\) data collection](#)

**NMDS / DSS**

[Indigenous-specific primary health care NBEDS December 2022](#)

**Guide for use**

Regular clients only.

**Disaggregation:**

1. Sex:
  - a) Male
  - b) Female.
2. Age group:
  - a) 18–24 years
  - b) 25–34 years
  - c) 35–44 years
  - d) 45–54 years
  - e) 55–64 years
  - f) 65 years and over.

## Disaggregation data elements:

### Data Element / Data Set

#### Data Source

[Aboriginal and Torres Strait Islander specific primary health care national Key Performance Indicators \(nKPI\) data collection](#)

#### NMDS / DSS

[Indigenous-specific primary health care NBEDS December 2022](#)

#### Guide for use

Aged 18 and over only.

### Data Element / Data Set

[Person—sex, code X](#)

#### Data Source

[Aboriginal and Torres Strait Islander specific primary health care national Key Performance Indicators \(nKPI\) data collection](#)

#### NMDS / DSS

[Indigenous-specific primary health care NBEDS December 2022](#)

#### Guide for use

Male and female only.

## Comments:

Census date for reporting is 31 December 2022.

## Representational attributes

**Representation class:** Count  
**Data type:** Real  
**Unit of measure:** Person  
**Format:** N[N(6)]

## Indicator conceptual framework

**Framework and dimensions:** [Person-related Factors](#)

## Data source attributes

### Data sources:

#### Data Source

[Aboriginal and Torres Strait Islander specific primary health care national Key Performance Indicators \(nKPI\) data collection](#)

#### Frequency

6 monthly

#### Data custodian

Australian Institute of Health and Welfare.

## Accountability attributes

<b>Reporting requirements:</b>	Funding agreements between the Department of Health and Aged Care (DHAC) and the organisations funded under the Indigenous Australians' Health Programme (IAHP).
<b>Organisation responsible for providing data:</b>	Indigenous-specific primary health care organisations or maternal and child health programs/services funded by the DHAC under its IAHP, referred to as <a href="#">funded organisations</a> .
<b>Accountability:</b>	Australian Institute of Health and Welfare/Department of Health and Aged Care

## Source and reference attributes

<b>Submitting organisation:</b>	Australian Institute of Health and Welfare
<b>Reference documents:</b>	WHO (World Health Organization) (2017) <a href="#">Body mass index – BMI</a> , WHO website, accessed 24 July 2019.
