Indigenous-specific primary health care: PI23a- Number of Indigenous regular clients with type 2 diabetes who have a blood pressure measurement result recorded, December 2022

Identifying and definitional attributes

Metadata item type:	Indicator
Indicator type:	Output measure
Short name:	PI23a-Number of Indigenous regular clients with type 2 diabetes who have a blood pressure measurement result recorded, December 2022
METEOR identifier:	779146
Registration status:	Indigenous , Superseded 18/12/2023
Description:	Number of Indigenous regular clients with type 2 diabetes who had a blood pressure measurement result recorded within the previous 6 months.
Rationale:	For Indigenous Australians with type 2 diabetes, monitoring blood pressure can help assure appropriate medical care to lower the risk of macrovascular (stroke, heart attack and heart failure) and microvascular (kidney disease, eye disease and peripheral neuropathy) complications.
Indicator set:	Indigenous-specific primary health care national key performance indicators December 2022 Indigenous , Superseded 18/12/2023

Collection and usage attributes

Computation description:	Count of Indigenous regular clients with type 2 diabetes who had a blood pressure measurement result recorded within the previous 6 months. Presented as a number. Results arising from measurements conducted outside of the organisation that are known by the organisation are included in the calculation of this indicator.
Computation:	Numerator only.
Numerator:	Number of Indigenous regular clients with type 2 diabetes who had a blood pressure measurement result recorded within the previous 6 months.
Numerator data elements:	Data Element / Data Set Person—diabetes mellitus status, code NN Data Source Aboriginal and Torres Strait Islander specific primary health care national Key Performance Indicators (nKPI) data collection NMDS / DSS Indigenous-specific primary health care NBEDS December 2022 Guide for use Type 2 diabetes only.
