Hip Fracture Clinical Care Standard: 7a-Evidence of local arrangements for the development of an individualised care plan for hip fracture patients prior to separation from hospital

Identifying and definitional attributes

Metadata item type:	Indicator
Indicator type:	Indicator
Short name:	7a-Evidence of local arrangements for the development of an individualised care plan for hip fracture patients prior to separation from hospital
METEOR identifier:	780939
Registration status:	Australian Commission on Safety and Quality in Health Care, Standard 10/09/2023
Description:	Evidence of local arrangements for the development of an individualised care plan for hip fracture patients prior to separation from hospital.
Indicator set:	Hip Fracture Clinical Care Standard 2023 Australian Commission on Safety and Quality in Health Care, Standard 10/09/2023

Collection and usage attributes

Computation description: Evidence of local arrangements for the development of an individualised care plan for hip fracture patients prior to separation from hospital. The local arrangements should specify the:

- Process to involve the person and their family or support people in development of the care plan
- Roles and responsibilities of each clinician working in the multidisciplinary team responsible for developing the care plan
- Information that should be documented in the patient's care plan
- Process to ensure that the patient's care plan is shared with the patient, and provided to their general practice, and other regular clinicians and care providers on discharge
- Services available to enable effective, culturally safe communication and access to services, support and contacts for people who have been transferred from remote locations and
- Process to assess adherence to the local arrangements.

Local arrangements include documented policies, pathways, procedures and policies.

The care plan should describe the patient's goals of care and ongoing care needs. The individualised care plan is separate to a clinical discharge summary and should:

- Identify any changes in medicines (including any new medicines) or ongoing pain management
- Identify any rehabilitation equipment needed and the contact details for rehabilitation services, and refer as required
- Describe mobilisation activities, wound care and function post-injury
- Provide information and recommendations for secondary fracture prevention, including contact details for services, where appropriate
- Recommend bone protection medicines to the patient and their general practitioner if they have not been started in the hospital.

Computation: Yes/No

A healthcare setting that has documented evidence of local arrangements that are implemented should record 'Yes.' Otherwise, the healthcare setting should record 'No.'

Comments: The ANZHFR *My Hip Fracture Guide: Information and Individual Care Plan* is a guide for patients, carers and families that provides important information about care after a hip fracture; the guide has been translated into 15 languages and is available on the [ANZHFR Website](#)

Te Tāhū Hauora Health Quality & Safety Commission has helped to develop *Recovering from a hip fracture: Pikinga orai tētahi whainga hope* booklet to meet the needs of the population in Aotearoa New Zealand who are recovering from a hip fracture. The booklet is available in both English and te reo Māori on the [Te Tāhū Hauora Health Quality & Safety Commission Website](#).

Representational attributes

Representation class: Count

Data type: Real

Unit of measure: Service event

Format: Yes/No

Accountability attributes

Reporting requirements: Hip Fracture Clinical Care Standard 2023

Organisation responsible for providing data: Health Service Organisations

Accountability: Health Service Organisations

Source and reference attributes

Submitting organisation: Australian Commission on Safety and Quality in Health Care
