Hip Fracture Clinical Care Standard: 8b-Proportion of patients with a hip fracture who returned to live in a private residence within 120 days following surgery

Identifying and definitional attributes

Metadata item type:	Indicator
Indicator type:	Indicator
Short name:	8b-Proportion of patients with a hip fracture who returned to live in a private residence within 120 days following surgery
METEOR identifier:	780971
Registration status:	Australian Commission on Safety and Quality in Health Care, Standard 10/09/2023
Description:	Proportion of patients with a hip fracture who returned to live in a private residence within 120 days following hip fracture surgery.
Indicator set:	Hip Fracture Clinical Care Standard 2023 Australian Commission on Safety and Quality in Health Care, Standard 10/09/2023

Collection and usage attributes

Population group age from:	50 years and older
Computation description:	<p>Private residence includes: a private home, community group home, boarding house and a unit in a retirement village. It excludes residential aged care facilities/rest homes, rehabilitation units (short term or other) and any other institutions.</p> <p>Both the numerator and the denominator only include patients who had hip fracture surgery who were followed up at 120 days. Exclude patients who:</p> <ul style="list-style-type: none">• Were reported at admission as not residing within a private residence or their place of residence was not recorded or recorded as 'Not known'.• Died during the hip fracture admission (i.e. where Episode of admitted patient care—separation mode, code N = 8 Died) or were deceased at the 120-day follow-up.
Computation:	$(\text{Numerator} \div \text{denominator}) \times 100$
Numerator:	Number of patients with a hip fracture who had hip fracture surgery living in a private residence prior to their hip fracture who returned to private residence within 120 days following their hip fracture surgery.
Denominator:	Number of patients with a hip fracture who had hip fracture surgery living in a private residence prior to their hip fracture.
Comments:	For hospitals collecting the Australian and New Zealand Hip Fracture Registry (ANZHFR) data set (ANZHFR Steering Group 2022), the variables <i>Usual place of residence</i> and <i>Place of residence at 120-day follow-up</i> can be used for this indicator.
