# Indigenous-specific primary health care: PI22a- Number of female Indigenous regular clients who have a cervical screening (HPV) test, June 2023

## Identifying and definitional attributes

<b>Metadata item type:</b>	Indicator
<b>Indicator type:</b>	Output measure
<b>Short name:</b>	PI22a-Number of female Indigenous regular clients who have a cervical screening (HPV) test, June 2023
<b>METEOR identifier:</b>	782730
<b>Registration status:</b>	<a href="#">Indigenous</a> , Superseded 25/02/2024
<b>Description:</b>	Number of female <a href="#">Indigenous regular clients</a> aged 25–74 who have not had a hysterectomy and who had a cervical screening (human papillomavirus (HPV)) test within the previous 5 years.
<b>Rationale:</b>	Cervical screenings are effective at detecting and treating cervical abnormalities when they are still precancerous and have been found to significantly reduce the incidence and mortality of cervical cancer. Indigenous women experience higher cervical cancer incidence and mortality than non-Indigenous women. Increasing participation in cervical screening is important to reduce the number of women who present with cervical cancer and ultimately die from the disease.
<b>Indicator set:</b>	<a href="#">Indigenous-specific primary health care national key performance indicators June 2023</a> <a href="#">Indigenous</a> , Superseded 25/02/2024

## Collection and usage attributes

<b>Population group age from:</b>	25 years.
<b>Population group age to:</b>	74 years.
<b>Computation description:</b>	<p>Count of female Indigenous regular clients aged 25–74 who have not had a hysterectomy and who had a cervical screening (HPV) test within the previous 5 years.</p> <p>Presented as a number.</p> <p>Count is of women, not tests.</p> <p>Cervical screening: a HPV test is a test that detects persistent HPV infection that causes the abnormal cell changes prior to the development of cervical cancer.</p> <p>From 1 December 2017 the screening test for cervical cancer changed from the Pap test to a test for HPV, and the recommended screening age changed from 18–69 to 25–74. The HPV test is offered every 5 years instead of every 2 as it was with the Pap test.</p> <p>Women are considered to have had appropriate screening if they have had a cervical screening (HPV) test within the previous 5 years.</p> <p>Include: HPV tests where the sample is either collected by a health practitioner or self-collected.</p>
<b>Computation:</b>	Numerator only.
<b>Numerator:</b>	Number of female Indigenous regular clients aged 25–74 who have not had a hysterectomy and who had a cervical screening (HPV) test within the previous 5 years.

**Data Element / Data Set**

[Person—age, total years N\[NN\]](#)

**Data Source**

[Aboriginal and Torres Strait Islander specific primary health care national Key Performance Indicators \(nKPI\) data collection](#)

**NMDS / DSS**

[Indigenous-specific primary health care NBEDS June 2023](#)

**Guide for use**

Aged 25–74 only.

**Data Element / Data Set**

[Female—hysterectomy indicator, yes/no code N](#)

**Data Source**

[Aboriginal and Torres Strait Islander specific primary health care national Key Performance Indicators \(nKPI\) data collection](#)

**NMDS / DSS**

[Indigenous-specific primary health care NBEDS June 2023](#)

**Guide for use**

No - has not had a hysterectomy only.

**Data Element / Data Set**

[Person—Indigenous status, code N](#)

**Data Source**

[Aboriginal and Torres Strait Islander specific primary health care national Key Performance Indicators \(nKPI\) data collection](#)

**NMDS / DSS**

[Indigenous-specific primary health care NBEDS June 2023](#)

**Guide for use**

Indigenous only.

**Data Element / Data Set**

[Female—cervical screening indicator, yes/no/not stated/inadequately described code N](#)

**Data Source**

[Aboriginal and Torres Strait Islander specific primary health care national Key Performance Indicators \(nKPI\) data collection](#)

**NMDS / DSS**

[Indigenous-specific primary health care NBEDS June 2023](#)

**Guide for use**

Yes - had a cervical screening test only.

#### Data Element / Data Set

[Person—sex, code X](#)

#### Data Source

[Aboriginal and Torres Strait Islander specific primary health care national Key Performance Indicators \(nKPI\) data collection](#)

#### NMDS / DSS

[Indigenous-specific primary health care NBEDS June 2023](#)

#### Guide for use

Female only.

#### Data Element / Data Set

[Person—regular client indicator, yes/no code N](#)

#### Data Source

[Aboriginal and Torres Strait Islander specific primary health care national Key Performance Indicators \(nKPI\) data collection](#)

#### NMDS / DSS

[Indigenous-specific primary health care NBEDS June 2023](#)

#### Disaggregation:

1. Age group.
  - a) 25–34 years
  - b) 35–44 years
  - c) 45–54 years
  - d) 55–64 years
  - e) 65–74 years.

#### Disaggregation data elements:
