This product, excluding the AIHW logo, Commonwealth Coat of Arms and any material owned by a third party or protected by a trademark, has been released under a Creative Commons BY 4.0 (CC BY 4.0) licence. Excluded material owned by third parties may include, for example, design and layout, images obtained under licence from third parties and signatures. We have made all reasonable efforts to identify and label material owned by third parties.

You may distribute, remix and build on this website's material but must attribute the AIHW as the copyright holder, in line with our attribution policy. The full terms and conditions of this licence are available at <https://creativecommons.org/licenses/by/4.0/>.

Enquiries relating to copyright should be addressed to info@aihw.gov.au.

Enquiries or comments on the METEOR metadata or download should be directed to the METEOR team at meteor@aihw.gov.au.

Advanced download options: Data Element

View Mode

Show Less and Show More

Previously known as "Friendly View" and "Technical View"
Modifies the attributes presented in metadata item.

Show more:

- Expands the Data Element from a link to it's attributes.
- Value Domain attributes expanded further from Identifying and Definitional attributes

The instant Word / PDF selection above the Advanced options will also download based on the current view mode on the screen, presented at the top right corner underneath "View".

If you're a registered user, the "View mode" will automatically load as Show more.

If you're not logged into METEOR, the "View mode" will automatically load as Show less.

Short name / Technical name

The selection of this download option will modify the Heading as the Short or Technical name. It will present the alternative (Short/Technical) name below it as an attribute.

Limit relational attributes

Download to limit relational attributes such as "*[x] that uses this item*" or "*Implemented in [x]*" to only show relationships that exist throughout the download.

The aim of this option is to reduce the size of downloads with items used across many metadata items (such as "Person" Object Class).

This does not apply to Related metadata references.

Additional Content

Include Supporting items

Selection of:

- Object Class
- Property
- Glossary Item

Any Glossary item linked throughout the metadata will download as a Supporting Item. This will also download any Glossary Items within the Glossary Item (maximum to one level down).

Registry management attributes

Include timestamps

Allows all users to download the "Created date" and "Last updated date" for the metadata item(s).

Include sensitive content

Allows Registration Authorities or Workgroup Members (not including Workgroup Viewers) to download the sensitive content of the metadata item, such as:

Unresolved issues

Submitting organisation contact details

Steward contact details

Created by (*Accessible to Workgroup users only*)

Last updated by *(Accessible to Workgroup users only)*
