# First Nations-specific primary health care: PI02a-Number of First Nations babies born within the previous 12 months who attended the organisation more than once, and who have a birthweight result within a specified category, December 2023

## Identifying and definitional attributes

<b>Metadata item type:</b>	Indicator
<b>Indicator type:</b>	Output measure
<b>Short name:</b>	PI02a-Number of First Nations born within the previous 12 months who attended the organisation more than once, and who have a birthweight result within a specified category, December 2023
<b>METEOR identifier:</b>	787942
<b>Registration status:</b>	<a href="#">Indigenous</a> , Standard 25/02/2024
<b>Description:</b>	<p>Number of First Nations babies born within the previous 12 months who attended the <a href="#">funded organisation</a> more than once, and whose <a href="#">birthweight</a> result was:</p> <ul style="list-style-type: none"><li>• low (less than 2,500 grams)</li><li>• normal (2,500 grams to less than 4,500 grams)</li><li>• high (4,500 grams and over).</li></ul>
<b>Rationale:</b>	Birthweight is a key indicator of a baby's immediate health and a determinant of their future health. Measuring birthweight allows infants to be given early and suitable intervention, which can mitigate adverse outcomes.
<b>Indicator set:</b>	<a href="#">Aboriginal and Torres Strait Islander specific primary health care national key performance indicators December 2023</a> <a href="#">Indigenous</a> , Standard 25/02/2024

## Collection and usage attributes

<b>Computation description:</b>	<p>Count of First Nations babies born within the previous 12 months who attended the funded organisation more than once, and whose birthweight result was:</p> <ul style="list-style-type: none"><li>• low (less than 2,500 grams)</li><li>• normal (2,500 grams to less than 4,500 grams)</li><li>• high (4,500 grams and over).</li></ul> <p>Presented as a number.</p> <p>Birthweight: defined as the first weight of a baby obtained after birth. Include only live births. Exclude unknown birthweight. The birthweight is to be taken from the baby's client record where available. Where the birthweight is not recorded in the baby's client record, the mother's record may be used as a source of birth details. The weight recorded must be the baby's weight at birth.</p> <p>Attended the organisation more than once: count attendance using the baby's client record only. Exclude babies who only attended before birth as part of the mother's antenatal care.</p> <p>Previous 12 months: refers to the previous financial year or previous calendar year.</p> <p>Include: results arising from measurements conducted outside of the organisation that are known by the organisation. For example, birthweight recorded in the baby's medical record at the organisation, or received from sharing client data with other organisations, such as a hospital.</p>
<b>Computation:</b>	Numerator only.

**Numerator:**

Calculation A: Number of First Nations babies born within the previous 12 months who attended the funded organisation more than once, and whose birthweight result was categorised as low (less than 2,500 grams).

Calculation B: Number of First Nations babies born within the previous 12 months who attended the funded organisation more than once, and whose birthweight result was categorised as normal (2,500 grams to less than 4,500 grams).

Calculation C: Number of First Nations babies born within the previous 12 months who attended the funded organisation more than once, and whose birthweight result was categorised as high (4,500 grams and over).

**Numerator data elements:****Data Element / Data Set**

[Service provider organisation—number of service contacts, total N\[NNNNN\]](#)

**Data Source**

[Aboriginal and Torres Strait Islander specific primary health care national Key Performance Indicators \(nKPI\) data collection](#)

**NMDS / DSS**

[Aboriginal and Torres Strait Islander specific primary health care NBEDS December 2023](#)

**Guide for use**

Babies are included if they had more than one service contact.

**Data Element / Data Set**

[Person—Indigenous status, code N](#)

**Data Source**

[Aboriginal and Torres Strait Islander specific primary health care national Key Performance Indicators \(nKPI\) data collection](#)

**NMDS / DSS**

[Aboriginal and Torres Strait Islander specific primary health care NBEDS December 2023](#)

**Guide for use**

The baby is considered to be First Nations if one or both parents identify as Aboriginal and/or Torres Strait Islander.

**Data Element / Data Set**

[Product of birth—birthweight, code N](#)

**Data Source**
