First Nations-specific primary health care: PI10a-Number of First Nations regular clients who have a smoking status result within a specified category, December 2023

Exported from METEOR (AIHW's Metadata Online Registry)

First Nations-specific primary health care: PI10a-Number of First Nations regular clients who have a smoking status result within a specified category, December 2023

Identifying and definitional attributes

Metadata item type:	Indicator
Indicator type:	Output measure
Short name:	PI10a-Number of First Nations regular clients who have a smoking status result within a specified category, December 2023
METEOR identifier:	787967
Registration status:	Indigenous, Standard 25/02/2024
Description:	Number of **First Nations regular clients** aged 11 and over whose smoking status result recorded within the previous 24 months was:

- current smoker;
- ex-smoker; or
- never smoked.

Rationale:	Smoking has been identified as one of the key risk factors contributing to the burden of disease for First Nations people. It is important that First Nations primary health-care organisations know the smoking status of clients in order to provide appropriate medical care.
Indicator set:	Aboriginal and Torres Strait Islander specific primary health care national key performance indicators December 2023 Indigenous, Standard 25/02/2024

Collection and usage attributes

Population group age from:	11 years and over.
Computation description:	Count of First Nations regular clients aged 11 and over whose smoking status result recorded within the previous 24 months was:

- current smoker;
- ex-smoker; or
- never smoked.

Presented as a number.

Calculated separately for each smoking status.

Operationalisation of smoking status: where a First Nations regular client's tobacco smoking status does not have an assessment date assigned within the Clinical Information System (CIS), smoking status as recorded in the CIS should be treated as current (that is, as having been updated within the previous 24 months).

Include: results arising from measurements conducted outside of the organisation that are known by the organisation.

Computation:	Numerator only.

Numerator:	Calculation A: Number of First Nations regular clients aged 11 and over whose smoking status result was recorded as 'current smoker' within the previous 24 months.
	Calculation B: Number of First Nations regular clients aged 11 and over whose smoking status result was recorded as 'ex-smoker' within the previous 24 months.
	Calculation C: Number of First Nations regular clients aged 11 and over whose smoking status result was recorded as 'never smoked' within the previous 24 months.
