First Nations-specific primary health care: PI13a- Number of female First Nations regular clients who gave birth within the previous 12 months, and who have their first antenatal care visit within a specified period, December 2023

Identifying and definitional attributes

Metadata item type:	Indicator
Indicator type:	Output measure
Short name:	PI13a-Number of female First Nations regular clients who gave birth within the previous 12 months, and who have their first antenatal care visit within a specified period, December 2023
METEOR identifier:	787979
Registration status:	Indigenous , Standard 25/02/2024
Description:	<p>Number of female First Nations regular clients who gave birth within the previous 12 months, and who:</p> <ul style="list-style-type: none">• had gestational age of less than 11 weeks recorded at their first antenatal care visit;• had gestational age of 11–13 weeks recorded at their first antenatal care visit;• had gestational age of 14–19 weeks recorded at their first antenatal care visit;• had gestational age of 20 weeks or later recorded at their first antenatal care visit;• did not have gestational age recorded at their first antenatal care visit; or• did not attend an antenatal care visit.
Rationale:	The primary care needs of all Australians are met effectively through timely and quality care in the community. Good antenatal care is associated with positive health outcomes for mothers and babies.
Indicator set:	Aboriginal and Torres Strait Islander specific primary health care national key performance indicators December 2023 Indigenous , Standard 25/02/2024

Collection and usage attributes

Computation description: Number of female First Nations regular clients who gave birth within the previous 12 months, and who:

- had gestational age of less than 11 weeks recorded at their first antenatal care visit;
- had gestational age of 11–13 weeks recorded at their first antenatal care visit;
- had gestational age of 14–19 weeks recorded at their first antenatal care visit;
- had gestational age of 20 weeks or later recorded at their first antenatal care visit;
- did not have gestational age recorded at their first antenatal care visit; or
- did not attend an antenatal care visit.

Presented as a number.

Calculated separately for each gestational age range.

Birth: includes live births and still births if the birthweight was at least 400 grams or the gestational age was 20 weeks or more.

Previous 12 months: refers to either the previous financial year or the previous calendar year.
Numerator only.

Computation:

Numerator:

Calculation A: Number of female First Nations regular clients who gave birth within the previous 12 months, and who had a gestational age of less than 11 weeks recorded at their first antenatal care visit.

Calculation B: Number of female First Nations regular clients who gave birth within the previous 12 months, and who had a gestational age of 11–13 weeks recorded at their first antenatal care visit.

Calculation C: Number of female First Nations regular clients who gave birth within the previous 12 months, and who had a gestational age of 14–19 weeks recorded at their first antenatal care visit.

Calculation D: Number of female First Nations regular clients who gave birth within the previous 12 months, and who had a gestational age of 20 weeks or later recorded at their first antenatal care visit.

Calculation E: Number of female First Nations regular clients who gave birth within the previous 12 months, and who did not have an antenatal care visit recorded.
