Heavy Menstrual Bleeding Clinical Care Standard: 5b-Evidence of local arrangements to refer or recommend patients with heavy menstrual bleeding to a clinician trained to insert levonorgestrel-releasing intrauterine devices

Identifying and definitional attributes

| | |
|-----------------------------|--|
| Metadata item type: | Indicator |
| Indicator type: | Indicator |
| Short name: | 5b-Evidence of local arrangements to refer or recommend patients with heavy menstrual bleeding to a clinician trained to insert levonorgestrel-releasing intrauterine devices |
| METEOR identifier: | 788540 |
| Registration status: | Australian Commission on Safety and Quality in Health Care, Standard 12/06/2024 |
| Description: | Evidence of local arrangements to refer or recommend patients with heavy menstrual bleeding to a clinician trained to insert levonorgestrel-releasing intrauterine devices (LNG-IUD), if this is not available within the service. |
| Indicator set: | Heavy Menstrual Bleeding Clinical Care Standard 2024 Australian Commission on Safety and Quality in Health Care, Standard 12/06/2024 |

Collection and usage attributes

| | |
|---------------------------------|---|
| Computation description: | <p>This indicator is only applicable in services where no trained clinician is available for insertion of a levonorgestrel-releasing intrauterine device.</p> <p>The local arrangements should document clinicians and/or services within the geographic region who can insert levonorgestrel-releasing intrauterine devices and a process to offer referral or recommendation to these clinicians or services where clinically appropriate.</p> <p>'Local arrangements' are policies, procedures and documented processes.</p> |
| Computation: | Yes/ No |
| | A healthcare setting that has documented evidence of locally approved arrangements that are implemented should record 'Yes'. Otherwise, the healthcare setting should record 'No'. |

Representational attributes

| | |
|------------------------------|---------------|
| Representation class: | Count |
| Data type: | Real |
| Unit of measure: | Service event |
| Format: | Yes/ No |

Accountability attributes

| | |
|---|--|
| Reporting requirements: | Not applicable |
| Organisation responsible for providing data: | Not applicable |
| Accountability: | Safety and quality monitoring and improvement, as part of the clinical care standard |

Other issues caveats: Applicable settings: General practice, and women's health, family planning and sexual health services/clinics where no trained clinician is available for insertion of a levonorgestrel-releasing intrauterine device.

This indicator can also be used in Aboriginal Community Controlled Health Services and Aboriginal medical services where appropriate.
