First Nations-specific primary health care: PI11a- Number of female First Nations regular clients who gave birth within the previous 12 months, and who have a smoking status result within a specified category, June 2024

Identifying and definitional attributes

Metadata item type:	Indicator
Indicator type:	Output measure
Short name:	PI11a-Number of female First Nations regular clients who gave birth within the previous 12 months, and who have a smoking status result within a specified category, June 2024
METEOR identifier:	789196
Registration status:	Indigenous , Standard 27/04/2024
Description:	<p>Number of female First Nations regular clients who gave birth within the previous 12 months, and whose smoking status result recorded during pregnancy was:</p> <ul style="list-style-type: none">• current smoker;• ex-smoker; or• never smoked.
Rationale:	<p>Smoking during pregnancy is a risk factor for adverse events in pregnancy, and can be associated with low birthweight, pre-term birth, fetal growth restriction, congenital abnormalities and perinatal death. Low birthweight infants are at a greater risk of dying during the first year of life and are prone to ill health in childhood. Smoking during pregnancy is also associated with increased risk of spontaneous abortion and ectopic pregnancy.</p>
Indicator set:	<p>Aboriginal and Torres Strait Islander specific primary health care national key performance indicators June 2024</p> <p>Indigenous, Standard 27/04/2024</p>

Collection and usage attributes

Computation description:	<p>Count of female First Nations regular clients who gave birth within the previous 12 months, and whose smoking status result recorded during pregnancy was:</p> <ul style="list-style-type: none">• current smoker;• ex-smoker; or• never smoked. <p>Presented as a number.</p> <p>Calculated separately for each smoking status.</p> <p>Birth: includes live births and still births if the birthweight was at least 400 grams or the gestational age was 20 weeks or more.</p> <p>Operationalisation of smoking status: include only the most recent smoking status recorded prior to the completion of the latest pregnancy. Where a First Nations regular client's tobacco smoking status does not have an assessment date assigned within the Client Information System (CIS), smoking status should not be counted.</p> <p>Include: results arising from measurements conducted outside of the organisation that are known by the organisation.</p>
Computation:	Numerator only.

Numerator:

Calculation A: Number of female First Nations regular clients who gave birth within the previous 12 months, and whose smoking status result recorded during pregnancy was 'current smoker'.

Calculation B: Number of female First Nations regular clients who gave birth within the previous 12 months, and whose smoking status result recorded during pregnancy was 'ex-smoker'.

Calculation C: Number of female First Nations regular clients who gave birth within the previous 12 months, and whose smoking status result recorded during pregnancy was 'never smoked'.

Numerator data elements:**Data Element / Data Set**

[Person—tobacco smoking status, code N](#)

Data Source

[Aboriginal and Torres Strait Islander specific primary health care national Key Performance Indicators \(nKPI\) data collection](#)

NMDS / DSS

[Aboriginal and Torres Strait Islander specific primary health care NBEDS June 2024](#)

Guide for use

'Daily smoker', 'weekly smoker' and 'irregular smoker' are aggregated into 'current smoker'.
