First Nations-specific primary health care: PI24a- Number of First Nations regular clients with type 2 diabetes who have a blood pressure measurement result within a specified category, June 2024

Identifying and definitional attributes

Metadata item type:	Indicator
Indicator type:	Output measure
Short name:	PI24a-Number of First Nations regular clients with type 2 diabetes who have a blood pressure measurement result within a specified category, June 2024
METEOR identifier:	789287
Registration status:	Indigenous , Standard 27/04/2024
Description:	Number of First Nations regular clients with type 2 diabetes whose blood pressure measurement result recorded within the previous 6 months was less than or equal to 140/90 mmHg.
Rationale:	People with type 2 diabetes have a higher risk of developing high blood pressure. The RACGP diabetes management guidelines currently recommend a target blood pressure of 140/90 mmHg for people with type 2 diabetes (RACGP 2020). Managing a healthy blood pressure can reduce the risk and slow the progression of chronic conditions, such as cardiovascular disease, nephropathy, and diabetic eye disease.
Indicator set:	Aboriginal and Torres Strait Islander specific primary health care national key performance indicators June 2024 Indigenous , Standard 27/04/2024

Collection and usage attributes

Computation description:	<p>Count of First Nations regular clients with type 2 diabetes whose blood pressure measurement result recorded within the previous 6 months was less than or equal to 140/90 mmHg.</p> <p>Presented as a number.</p> <p>Blood pressure result: the client does not have a blood pressure measurement of less than or equal to 140/90 mmHg if either the systolic or diastolic reading is above the threshold (140 and 90 respectively).</p> <p>Include: only the most recently recorded result if the client has had more than one blood pressure measurement within the previous 6 months.</p> <p>Exclude: type 1 diabetes, secondary diabetes, gestational diabetes mellitus (GDM), previous GDM, impaired fasting glucose, impaired glucose tolerance.</p>					
Computation:	Numerator only.					
Numerator:	Number of First Nations regular clients with type 2 diabetes whose blood pressure measurement result recorded within the previous 6 months was less than or equal to 140/90 mmHg.
